

INDICATOR LIGHT SYSTEMS

One or two light system connected via a custom harness to the engine immersion heater. It allows operators or fleet maintenance personnel to quickly determine power availability and confirm that the heater is operational.

BENEFITS

- Prevents no-starts
- Lights are visible up to 150 feet making it possible to monitor conditions from a distance
- Tests engine immersion heater and electrical circuit every time it's plugged in
- Option to upgrade current block heater with this system
- Easy and quick installation; can be retro-fitted to an existing heater or installed on new vehicles

AVAILABLE IN THREE VERSIONS:

SINGLE HEATER – DUAL LIGHT VERSION

- Part number: 3600049

DUAL HEATER – DUAL LIGHT VERSION

- Part number: 3600061

SINGLE LIGHT INDICATOR VERSION

- Part number: 3600099

SYSTEM SPECIFICATIONS

DIMENSION:

- Mounting Plate: 3.56" (90 mm) width x 2.56" (65 mm) height

ELECTRICAL REQUIREMENTS:

- 120 Volts AC
- 15 Amp maximum load
- Standard 15 Amp electrical service outlet
- 150 Watt – 1800 Watt heater requirements range
- CSA – approved LR2820
